CONFERENCE  
Winter 2024

**HEALTHCARE REVOLUTION**  
Restoring the Doctor-Patient Relationship

---

February 2-4, 2024 • Phoenix, Arizona

# Shedding Case Study #1

- 30 year old male, vaccine injured
- Living with partner who works in a restaurant
- Travel to NYC
- Travel to NY for MSC/Exosome clinic
- Travel to CO for stent placement

# Shedding Case Study #2

- 54-year-old male, vaccine injured
- Living with partner who is vaccine injured
- Two hours with a boosted friend
- Travel to FL for conference
- A week of shedding: dentist, network meeting, dining out

# Shedding Case Study #3

- 70-year-old female, vaccine injured
- Exercise class with 60 others, majority vax/boosted

# Shedding Case Study #4

- 71-year-old male, post-acute sequelae of COVID (PASC)
- Stage/grade 3.5 of 4 amyloid fibrin micro-clotting
- Spike ab 2.3 U/mL
- Recovery: walking 4 miles/day, weight gain, cognition
- Status post cataract surgery, decompensation

# Shedding Case Study #5

- 60-year-old male, unvaccinated, COVID twice
- Spike ab 16,000 U/mL
- Close contact with college age male population

# Shedding Case Study #6

- 40-year-old female, **UNVACCINATED**, spike antibodies 0 U/mL! (Olympic level faster)
- **3/2/21 Optometry...3/4/21 Dentist** → N/V x5 days, HA for 1 week after
- **3/8/21 left rib pain...3/11/21 rash** under left armpit
- **3/12/21 haircut** → migraine w/ N/V x2 days
- **3/15/21 dentist** → pink urine x1 week
- **3/26/21-3/30/21** → heavy menses → 3/31/21-4/3/21 → big clots
- **4/9/21 Chiropractor...4/22/21 OB/GYN...4/27/23 OB/GYN**
- **5/7/21 left sided abdominal pain...5/17/21 enormous, twisted ovarian cyst** on MRI
- **Many medical visits for mother** regarding her cataract surgery
- **6/4/21 surgical removal of football-sized ovarian cyst**, twisted x3, ruptured

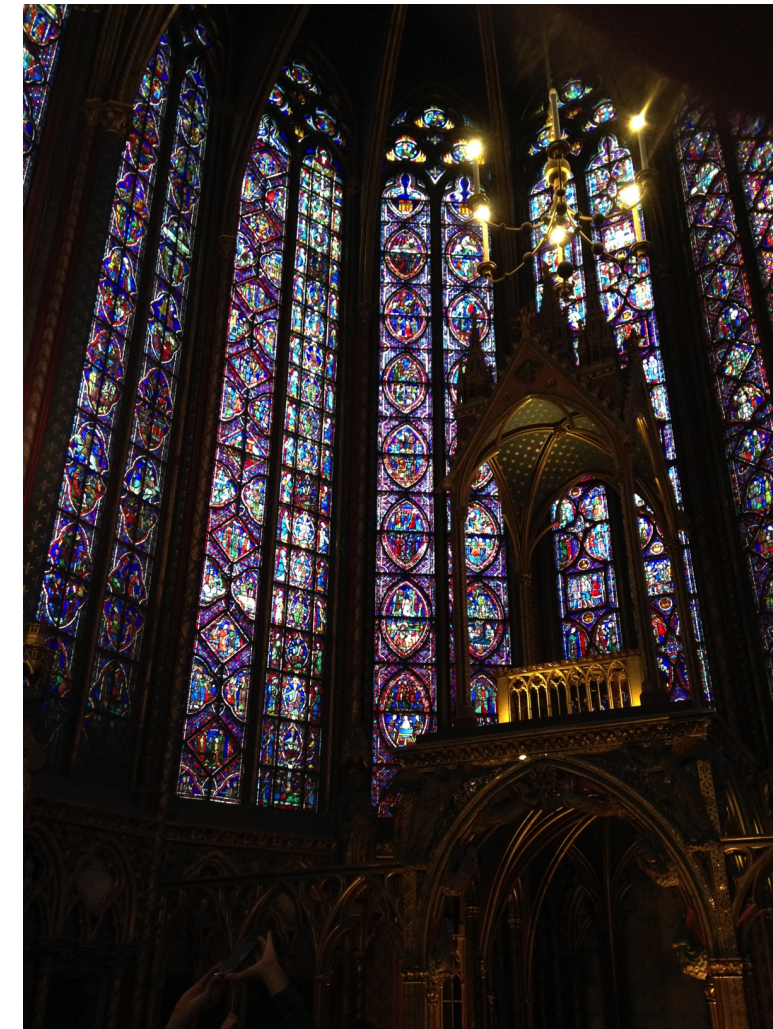

# A Perspective on Risk... *The Four Ds*

## Density

## Dimensions

## Draft

## Duration

# Spike Antibodies Jump After 9/23 Booster Rollout

- **8/23** Spike ab 19,476U/mL
- **11/15/23** Spike ab >25k
- **6/23** Spike ab 9,466 U/mL
- **12/4/23** Spike ab 23,616
- **12/21** 140 U/mL
- **10/5/23** Spike ab >25k
- **8/23** Spike ab 250 U/mL
- **10/24/23** Spike ab 10,321
- **7/23** Spike ab 5,792 U/mL
- **10/14/23** Spike ab >25k
- **7/23** Spike ab 157 U/mL
- **10/23/23** Spike ab >25k

# **What To Do?**

- **Ivermectin**
- Minimum 12mg daily
- **NAC Augmentata**
- 1 cap twice daily
- **Nattokinase**
- 4,000fu twice daily
- **Green Tea**
- Sencha or Macha (>EGCG)
- **Intermittent Fasting** >=16 hours/day
- **Chaperone Guided Autophagy**
- Heat shock proteins

- **Baobab**
- Antiviral, anitbacterial, antifungal
- Glucose modulating
- Bifida bacterium
- Spike blocking
- Microclot inhibiting

- How?
- Work up from ¼ tsp to 1 Tbsp
- Mix in 16oz water
- Sip over at least eight hours

- **Assess Risk**
- Use the 4Ds
- Understand that medical visits aren't benign
- Follow spike ab levels
- Respond to feedback from your body

- **Traditional Chinese Medicine**
- Eye drops
- Nasal spray
- Formulation is anti-viral, but spike is the target
